Supply and Demand: Toilet Paper Edition Leader Instructions

Thank you for downloading this product. This unit is designed to engage the student in what they are learning. This unit study was created to be facilitated by a leader with group interaction or as a Give 'N Go Study. The "Give and Go" series is designed so that the child, with your permission, is given the unit study and can independently learn it on their own. The child must be able to read and follow directions. If following directions is a challenge, this is the perfect way for them to boost their capabilities.

Supply and Demand: Toilet Paper Edition Unit Study Supply List (per child):

Printed Unit Study	Random Items for a Scavenger Hunt
Pencils	Dry Erase Board
Electronic Device	Dry Erase Marker
Internet Access	Scissors
Dictionary	

What subjects are covered in this Unit Study?

This unit study covers Math, Vocabulary, Writing, Economics, and History.

YouTube Videos

There are two YouTube videos in this study. The first one is a lesson on Supply and Demand. It explains it easily so everyone can understand the concept.

The second one is a new report about the 2020 toilet paper shortage in the USA.

Vocabulary

There are three vocabulary exercises in this lesson plan. The words the student will look up and define are supply, demand, and hoard. They will need to look these words up in the dictionary or on the internet and write them down in the indicated boxes.

Supply means a stock or supply of a resource which is available to consumers.

Demand means a desire of consumers for a certain product or service.

Hoard means a huge amount of goods hid or stored away.

Supply and Demand: Toilet Paper Edition Leader Instructions

Indoor Scavenger Hunt

In this portion of the study, the child is instructed to get 3 various items they can find in their house. They will determine whether those items are in demand or supply in their home. They will write the name of the item in the correct column on their paper.

"Give Me the Toilet Paper!" Game

In this game, the student will get to experience what supply and demand are as the toilet paper price fluctuates. As the price changes, it will determine how much they can purchase on their turn.

This game can be played with a single player, but it is more fun when you have more players.

The goal of this game is to get 10 rolls of toilet paper. If you are playing with more than one player, the first one to get 10 rolls of toilet paper wins!

You will need the game cards in this unit study, a dry erase board, and a dry erase marker.

1. Cut out the game cards and sort them into the following three piles: Playing Cards, Toilet Paper Rolls, and Money Squares.
2. To start the game, the price of toilet paper is \$2. Write \$2 on the dry erase board.
3. When it is your turn, you are paid \$2 in Money Squares.
4. Then you will draw a playing card. This card will tell you whether the price of toilet paper for your turn has increased or decreased.
5. Once you have drawn your playing card, change the toilet paper price on your dry erase board by either adding or subtracting the amount on the playing card.
6. For example, the price starts at \$2 and you draw a "Demand is Flowing, Price Has Increased \$1" card, you will change the price of toilet paper to \$3.
7. Once you have changed the price of toilet paper, you can decide if you want to purchase a roll or save your money. You may not have enough money to buy for that round.
8. If the price of toilet paper plunges, it cannot go lower than \$1. It will always be at least \$1 per roll.
9. Repeat this process until you have purchased 10 rolls of toilet paper.

Supply & Demand

Hello! Thanks for joining us! As you read along, please stop and do the activities. Today we are talking about supply and demand. By the end of this lesson, you will understand how it all works.

Start Here

https://youtu.be/720uyg0Dd_M

Part One: Vocabulary

Look up the words *supply* and *demand* in a dictionary or on the internet. Write the definitions below:

Supply

Demand

Supply & Demand

Think about the supplies that you use every day at home. What if you couldn't get those items or the price was raised, and you couldn't afford to make those purchases.

Part Two: Indoor Scavenger Hunt

It's time to get up and get moving! Look through your house and find 3 things that your family uses every day.

Using the definitions of supply and demand, figure out whether those items are currently in supply or demand.

For example, if you have 20 oranges available for the family to eat, then they would be considered supply because there are enough oranges for everyone to eat.

However, if there is one apple for the whole family to enjoy, then it is demand because there are more family members than there are apples.

Write your items in their correct columns below.

Supply

Demand

Supply & Demand

In 2019, the coronavirus or COVID-19 began to spread worldwide making some people very sick. The number of deaths began to rise as countries tried to fight the sickness off.

Many country's governments including the United States of America issued a stay at home order. A stay at home order in the USA is when the government suggests its citizens stay in their homes unless they need food, gas, or medical assistance.

The virus had caused a large demand for a lot of items like food, toilet paper, and other paper products.

Every time a person went to the store it was to hunt for toilet paper. If you were able to find a package, it felt like gold!

The demand for toilet paper went up because everyone wanted it at the same time. The supply of toilet paper that was in the stores or available through other companies was not enough to meet the demand.

Everyone needed more and since the supply had a shortage, some people began to panic and hoard toilet paper.

Supply & Demand

Part Three: Vocabulary

Look up the word hoard in a dictionary or on the internet.
Write the definition below:

Hoard
